| Undervisere:               | Thomas Habekost, Department of Psychology, University of Copenhagen  |
| Sprog:                     | English/dansk  |
| Antal ECTS:                |  |
| Kursusbeskrivelse:         | Cognitive neuroscience is a rapidly growing interdisciplinary field that combines experimental psychology and various disciplines within neuroscience, computer science, philosophy, linguistics, and others, for a unified approach to the study of mind-brain problems. At the core of cognitive neuroscience are experimental investigations that combine measurements of psychological function and brain processes. The Ph.D. course offers an introduction to some of the main methods for conducting such studies. The methodology will be related directly to relevant problems within the participant's Ph.D. projects. |
| Målgruppe:                 | Ph.D.-studerende   |
| Tilmelding:                | Tilmelding sker via hjemmesiden<br><a href="http://www.psy.ku.dk/Forskning/phd-skolen/kurstilmelding/">http://www.psy.ku.dk/Forskning/phd-skolen/kurstilmelding/</a>   |
